TO WHOMSOEVER IT MAY CONCERN

Sumit creation has procured Two Motex 15000 'Uniflo' Stenter Machines of Six chambers each from M/S **InspirOn Engineering Pvt. Ltd. Ahmedabad** in year 2025.

We are doing process of Heat-setting, drying, blooming and finishing on 100% Polyester (BSY, Suiting, Burkha, Lachka, Nida & more) of GSM range from 40 to 250 on **Motex** Stenter.

For Ideal fabric; optimal pickup from Padder, uniform Heat distribution and Temperature uniformity is compulsory from Stenter, which we have obtained in **Motex** Stenter.

We have observed that **Motex** consistently delivers superior performance compared to other Stenter, in terms of mechanical robustness, electrical design, lower utility consumption, minimal radiation heat loss, and overall craftsmanship quality.

We are very much gratified with **InspirOn** team for their technical expertise, responses and professionalism.

We wish **InspirOn** very good success for their future projects.

Mr. Manan Agarwal

(Director)
