TO WHOMSOEVER IT MAY CONCERN

Arvind Limited has procured its **15th Motex Stenter Machine** from InspirOn Engineering in October 2022. These stenters are installed in our various divisions such as Denim, Knits, Bottom Weight, Shirting and Voiles.

The Stenter Machines are being used for various processes like Heat Setting, Finishing, Drying and Stretching for Printing.

We appreciate continuous efforts of InspirOn Engineering in terms of bringing positive technological changes in their latest model "Motex 15000 Uniflo". The said machine is at par with European Stenters with respect to Design, Utility Consumption, Workmanship and Productivity which is in line with our philosophy of "ATMANIRBHAR BHARAT". We shall always consider Motex Stenter for our future requirement.

We also appreciate InspirOn's prompt service back-up and technical support.

We wish InspirOn Engineering very good success for their future projects.

Punit Lalbhai
Executive Director
